Education

University of Virginia **Charlottesville, VA**
Ph.D. Candidate, Graduate Teaching Assistant, Adviser: Peter Abramenko *2014–2020*
Thesis: Finite Generation of Kac-Moody Groups over Small Fields

Grove City College **Grove City, PA**
B.S. Mathematics, Secondary Education Certification *2010–2014*
GPA: 3.97, Dean's List with High Distinction (8 semesters), Summa Cum Laude

Teaching

Instructor, University of Virginia, 2015–Present

Math 1110: Probability and Finite Math (Non-Coordinated) *Spring 2019, Spring 2020*
Math 1310: Calculus I (IBL with a Flipped Classroom) *Fall 2018, Fall 2019*
Math 1310: Calculus I *Fall 2017*
Math 1220: Survey of Calculus II *Spring 2016, Fall 2016, Spring 2017*
Math 1210: Survey of Calculus I *Fall 2015*

Teaching Assistant, University of Virginia, 2014–2015

Math 1320: Calculus II *Fall 2014 (2 Sections), Spring 2015*

Curriculum Developed, University of Virginia, 2016–Present

Math 1110: Wrote and implemented my own curriculum
Math 1310: Continue to develop and improve curriculum for calculus with a flipped classroom
Math 1210: Wrote additional materials to accompany and improve the previous curriculum

Student Teacher, Grove City College, 2013

Bulter High School: AP Statistics and Advanced Precalculus *Fall 2013*

Tutor, Grove City College and University of Virginia, 2010–Present

Peer and Private Tutor: Various classes including calculus 1 and 2, linear algebra, abstract algebra, real analysis, financial math, computer programming, and others

Research

Interests

Geometric/Combinatorial Group Theory: Buildings and groups with RGD systems, particularly, finiteness properties of groups acting on buildings. I am currently working on my thesis which involves finite generation of Kac-Moody groups over small fields.

Game Theory: Nim type games played on groups by picking generating sets. Research is part of an undergraduate REU in which I was a co-adviser.

Machine Learning/AI: A personal project of mine is continuing interest in different aspects of machine learning, specifically those with applications to games.

Projects

Finite Generation of Kac-Moody Groups over Small Fields *(Ph.D. thesis, in progess)*

Normalizer of Coxeter Groups in the Canonical Linear Representation *(in preparation)*

Conferences Attended

March 2020: AMS Sectional Meeting, University of Virginia, VA

January 2019: Joint Math Meetings, Baltimore, MD

May 2017: Conference on Combinatorial/Geometric Methods in Group Theory, University of Illinois, IL

Former Research Experiences

Director's Summer Program: Internship, Summer 2013 *Department of Defense*

REU on Graph Pebbling Problems: Summer, 2012 *Hope College, Holland, MI*

Service

Undergraduate Math Club Talk **University of Virginia**
Irrational and Transendental Numbers *Spring 2020*

Sonia Day **University of Virginia**
Organizer and Volunteer *Spring 2019*

UVA Math Ambassadors Coordinator **University of Virginia**
Organized graduate student visits to local middle and elementary *2018-2019*

UVA Math Ambassadors **University of Virginia**
Volunteer *2015-Present*

Summer REU **University of Virginia**
Graduate Adviser *Summer 2018*

Prospective Graduate Student Open House **University of Virginia**
Panelist *2015-2018*

Graduate Teaching Mentor **University of Virginia**
Observed and mentored first-time instructors *Fall 2017*

Kappa Mu Epsilon **Grove City College**
President *2013-2014*

Kappa Mu Epsilon **Grove City College**
Vice President *2012-2013*

Awards and Recognition

All-University Graduate Teaching Award — **University of Virginia**
Nominee — *2019*

Mathematic's Department Outstanding TA Award — **University of Virginia**
Recipient — *2019*

Philip N. Carpenter Senion Mathematics Award — **Grove City College**
Recipient — *2014*

Franklin C. Ketler Mathematics Prize — **Grove City College**
Recipient — *2014*

Skills

Computer Programming: Advanced coursework in C++ and C# including development of GUI applications. Self taught experience with Python including common libraries. Minimal HTML/CSS experience.

Machine Learning: Theoretical understanding of neural networks, convolutional neural networks, and various neural network architectures. Also includes personal study of PyTorch.

Typesetting: Extensive experience with LaTeX, including doctoral thesis and beamer presentations.

Mathematical Software: Experience with Mathematica.

Microsoft Suite: Extensive experience with Excel, including Excel VBA. Experience with Word, Powerpoint, and Outlook.
